Profile

Dynamic IT professional with 20+ years of experience in network administration, IT infrastructure management, and implementing innovative technology solutions to enhance operational efficiency. Experienced in implementing online attendance systems integrated with biometric technologies, significantly improving data processing efficiency and accuracy. Skilled in network administration and wireless communication technologies, ensuring reliable connectivity across multiple company sites. Dedicated to driving technological innovation that enhances team performance, streamlines operations, and increases productivity.

Education

STIKOM SURABAYA
Bachelor of Science
Management Informatics

Accomplishments

- Performed analysis and monitoring of internet backbone traffic on the main router, calculated bandwidth requirements, and ensured sufficient resources for all user applications, including internet, ERP, and VPN connectivity.
- Ensured data cabling installations followed standard network topology to maintain optimal network performance. Performed cabling system reinstallation to resolve performance issues and ensured all PCs were properly connected to the modular patch panel.
- Managed network traffic by implementing a MikroTik CCR router with firewall, failover, and bandwidth management features, and separating users into multiple work areas using VLAN segmentation.
- Developed policies, SOPs, and documentation forms for the administrative system.
- Installed an online fingerprint/face recognition machine, configured an attendance management application, and

SKILLS

- Operating system: Windows 10/11, Kali Linux, Ubuntu Linux.
- Windows Server 2019: Active Directory, DNS, GPOs, FSRM.
- Networking concept: IPv6, Routing, Switching, Firewall.
- Network administration: Cisco, MikroTik, Fortigate.
- Wireless network: Mikrotik, Ubiquiti, Cambium.
- Virtualization Technologies: VMware vSphere, Proxmox VE.
- Network Simulation: GNS3, Cisco Packet Tracer.
- IP Camera Systems: PTZ & Dome Cameras (Hikvision/Dahua).
- Motorola Radio & Repeater: Xirm3688, 8668i, GR500/CDR700/SLR5300.
- Telephony Systems: Panasonic PABX/IP-PBX Hybrid.
- Attendance Systems: Face Recognition, Fingerprint & RFID Devices.
- HRIS Systems: Attendance Management and Payroll Solutions.
- Programming: AI LLM, API Integration, JavaScript, PHP-Laravel, SQL.
- Technologies: Cloud computing, IoT, Cybersecurity.
- GPS Tracking, Solar Power System.

WORK EXPERIENCE

PT. RODA JAYA SAKTI, CENTRAL SULAWESI
Section Head of Information Technology
August 2023 – April 2026

Achievements

- Configured and optimized Active Directory services for rodajayasakti.co.id, facilitating efficient Group Policy implementation and centralized user account management.
- Resolved issues caused by improper router configurations and non-centralized cable network installations on the main switch, which resulted in unstable and frequent data connection interruptions.
- Engineered a comprehensive cable management system that standardized network installations and reduced troubleshooting time by 40% for hardware-related connectivity issues.
- Replaced all analog radios installed in every heavy equipment unit with digital radio models.
- Replaced manual spreadsheet attendance tracking with a new application system, which integrates facial recognition and fingerprint machines to achieve a 95% reduction in manual data entry.
- Implemented a point-to-point wireless network infrastructure to support attendance systems and PTZ cameras in dynamic mining areas, achieving 95% connectivity uptime. Installed solar power systems to support equipment with improved power efficiency and electrical safety.
- Managed, maintained, and inventoried company-wide IT assets and infrastructure supporting business operations.
- Developed and enhanced an inventory management application to support warehouse operations and General Affairs (GA) asset management.

PT. SAMUDERA MULIA ABADI
ICT Supervisor
April 2016 – November 2022

Achievements

- Implemented, configured and managed Active Directory Server.
- Successfully built and deployed office IT infrastructure from the ground up at new project sites during early production operation.
- Deployed wireless access point infrastructure to support the Fleet Management System in field operational areas.
- Installed wireless point-to-point links to support PTZ camera systems in pit areas.
- Constructed a mini shelter for communication equipment and implemented a solar power system for remote site operations.
- Managed ISR radio permit registration and configured Motorola CDR700 repeater systems.

Responsibilities

- Managed IT operations across three project sites: Toka, Weda, Gag.
- Led IT project implementations and ensured successful project delivery within scheduled timelines.

PT LOGINDO SAMUDERA MAKMUR TBK

processed attendance data as part of the payroll process.

- Set up and configured access to the company's email system.
- Developed a website to promote the company profile and showcase company achievements.
- Assisted in the implementation of applications to improve production targets and business processes.
- Managed user access authorization to the company's internal data by implementing Active Directory Domain Services.
- Implemented a data storage management system using File Server Resource Manager (FSRM) to control and manage file storage policies.
- Developed and implemented a backup and recovery system to ensure data availability and rapid server recovery in the event of system failures.
- Installed and configured a hybrid PABX system to enable communication among employees across project areas via IP phones.
- Implemented a point to point wire-less network across multiple areas to support internet connectivity and provide backbone links for PTZ cameras.
- Installed IP cameras in building areas and PTZ cameras to provide wider surveillance coverage in the pit area.
- Built solar power systems for devices in locations without access to electrical power lines.
- Installed and implemented a grounding system to protect IT equipment from lightning strikes.
- Installed and configured a radio repeater system using Motorola GR500 /CDR700.
- Installed and configured digital radio devices in mobile units and base stations operating in work areas.
- Installed GPS tracking systems for LV units and logistics trucks using GSM networks.

ICT Supervisor

July 2014 – April 2016

Achievements

- Implemented, configured, and managed Active Directory Server.
- Redesigned and rebuilt the structured cabling system using modular patch panels in the server room to meet operational and installation standards.

Responsibilities

- Oversaw daily IT operations for the Balikpapan office and Muara Kembang shipyard
- Provided operational support and maintenance for internet, email, and ERP systems supporting vessel operations.
- Configured and maintained email and communication systems to operate over satellite networks for offshore vessels.

PT. BORNEO CAHAYA KEMILAU

System Administrator

May 2012 – July 2014

Role Description

- Installed and configured computer and server systems, including hardware, operating systems, and local applications.
- Designed, maintained, and optimized network infrastructure performance, including backup management.
- Configured MikroTik devices for firewall, bandwidth management, routing, bridging, and point to point wireless connectivity.
- Developed a payroll application using Microsoft Access to process attendance data collected from fingerprint machines.

PT. Telen Indoclay

IT Superintendent

November 2008 – April 2011

Role Description

- Built and implemented IT infrastructure for office operations, including:
 1. Internet backbone connectivity.
 2. Router and firewall configuration.
 3. File sharing server implementation.
 4. Antivirus server deployment and management.

PT. PETROSEA

IT SUPPORT SITE/COMMUNICATION, OFFICER

November 2001 – Mei 2008

Role Description

- Provided technical support for hardware, software, and network-related issues for end users.
- Maintained radio communication systems and Motorola GR500 repeater infrastructure to ensure reliable operational communications.
- Troubleshoot and resolved issues related to UPS systems, printers, wireless connectivity, network infrastructure, and telephone/data cabling systems.
