RUDI FAISAL

IT SUPERVISOR | INFRASTRUCTURE, NETWORK & DIGITAL SOLUTIONS

https://wa.me/+6282159177311 | https://rudipaisal.github.io

Professional Summary

IT leader with 20+ years of experience managing infrastructure, networks, systems, communications, and business technology across corporate, industrial, mining, shipyard, offshore, and remote-site environments. Combines hands-on engineering with IT operations leadership, software development, and process improvement. Experienced in complex connectivity (PTP, VPN, MPLS), business applications, cloud/VPS concepts, AI Agents, n8n automation, and Laravel chatbot integration with AI model APIs.

Key Achievement

- Cut manual attendance data entry by approximately 95% by replacing spreadsheet-based processing with facial-recognition and fingerprint attendance solutions.
- Reduced hardware-related troubleshooting time by approximately 40% through standardized network cable management.
- Delivered point-to-point wireless links for attendance and PTZ surveillance at changing mining locations, achieving approximately 95% connectivity uptime.

Professional Experience

PT Roda Jaya Sakti | Section Head of Information Technology **Aug 2023 - Apr 2026**

- Replaced all analog radios installed in every heavy equipment unit with digital radio models.Replaced manual spreadsheet attendance tracking with a new application system, which integrates facial recognition and fingerprint machines to achieve a 95% reduction in manual data entry.
- Improved Active Directory and centralized account/policy administration; resolved recurring router, core-switch, and cabling issues.
- Standardized cabling, migrated field radio communications from analog to digital, and deployed PTP wireless for attendance and PTZ surveillance.
- Strengthened remote-site technology with solar-powered solutions and enhanced inventory application and IT asset lifecycle management.

PT Samudera Mulia Abadi | ICT Supervisor **April 2016 - Nov 2022**

- Built IT facilities for new sites; deployed wireless infrastructure for Fleet Management Systems and PTZ surveillance.
- Established centralized identity/access administration and coordinated technology projects from requirements and planning through handover.
- Developed a remote communications shelter with independent solar power and supported Motorola repeater systems and radio licensing.

PT Borneo Cahaya Kemilau, Tbk | System Administrator **Mar 2012 - Jun 2014**

- Administered servers, workstations, connectivity, and backup/recovery; managed MikroTik routing, firewall, bandwidth, and wireless links.
- Developed a Microsoft Access payroll application that processed attendance collected data from fingerprint devices.

Professional Experience

PT PT Telen Indoclay | Section Head of Information Technology **Nov 2008 - Apr 2011**

- Established internet backbone connectivity, router/firewall infrastructure, centralized file sharing, and antivirus management.
- Maintained infrastructure availability and resolved technical issues affecting daily business operations.

PT Petrosea, Tbk | Communication Officer **Nov 2001 - May 2008**

- Supported operational IT and communications, including Motorola GR500 repeater systems, UPS, printers, wireless connectivity, structured cabling, and telephony/data infrastructure.

Technical/Capabilities

Network & Infrastructure

TCP/IP, VLAN, routing & switching, DHCP/DNS, NAT, firewall, bandwidth management, failover, structured cabling, PTP wireless (MikroTik/ Ubiquiti/cambium) , VPN, MPLS, MikroTik/Cisco, access points.

Servers & Security

Virtualization Technologies: VMware Vsphere, Proxmox VE. Ubuntu, Kali Linux, Windows Server, Active Directory, Group Policy, file server/FSRM, backup & recovery, endpoint protection, Fortinet, antivirus, user access management, network monitoring. Network Simulation: GNS3, Cisco Packet Tracer.

Software & Business Applications

Software programming; Laravel, MySQL, HTML, CSS, JavaScript, Microsoft Access; payroll, attendance, inventory, and service-maintenance applications; business-process integration.

Cloud, AI & Automation

Cloud computing and VPS concepts; AI Agents; n8n workflow automation; implementation of Laravel chatbots integrated with AI model APIs.

Communication & Surveillance

Motorola analog/digital radio, GR500/CDR700 repeaters, PABX/IP-PBX, satellite communication, CCTV /IP/PTZ cameras, wireless surveillance links, IoT, GPS Tracker, solar-powered remote systems.

IT Leadership & Operations

IT operations, infrastructure planning, incident/problem management, root-cause analysis, SOP/documentation, vendor coordination, IT asset management, project delivery, backup/continuity, remote-site support

Training

Networking and Administration (Certificates): ICND, Wireless Essential, Windows Server Administration. Radio Communication: Motorola radio programming and troubleshooting. Safety Performance: Basic Safety, HIRA, JSEA.

Education

Bachelor of Science : Management Informatics, Dinamika University of Surabaya
