

RUDI FAISAL

Information Technology Section Head

Professional Summary

- IT professional and technology leader with 20+ years of experience delivering infrastructure, systems, network, communication, and technology solutions across office, industrial, mining, shipyard, off shore, and remote site environments.
- Experienced in leading IT operations and infrastructure initiatives involving network connectivity, server environments, communication platforms, surveillance, workforce systems, IT assets, and business applications.
- Strong hands-on background in infrastructure planning, technical problem solving, root cause analysis, system reliability, process improvement, project delivery, and remote site technology deployment, with a proven ability to translate operational requirements into practical and sustainable IT solutions.

Professional Experience

PT. Roda Jaya Sakti, central Sulawesi
Section Head of Information Technology (08/2023 – 04/2026)

Led IT operations and technology infrastructure supporting business and mining activities, covering multi site IT systems, connectivity, communications, surveillance, workforce technology, and IT assets.

Key achievements

- Optimized the company's Active Directory environment for rodajaya.sakti.co.id, establishing centralized account administration and effective policy enforcement.
- Diagnosed and resolved recurring connectivity interruptions caused by inconsistent router configurations and non standardized cable installations at the core switch level.
- Engineered a standardized network cable management approach, reducing hardware related troubleshooting time by approximately 40%.
- Led the migration from analog to digital radio communication across heavy equipment operations, strengthening field communication capabilities.
- Replaced spreadsheet based attendance processing with an integrated facial recognition and fingerprint solution, reducing manual data entry by approximately 95%.
- Designed and deployed point to point wireless connectivity for attendance devices and PTZ surveillance across changing mining locations, achieving approximately 95% connectivity uptime.
- Introduced solar powered solutions for technology and communication equipment in remote areas with limited electrical infrastructure.
- Directed company wide IT asset control, inventory, maintenance, and infrastructure administration.
- Enhanced an inventory management application supporting warehouse operations and General Affairs asset administration.

PT. Samudera Mulia Abadi
ICT Supervisor (04/2016 – 11/2022)

Managed IT services and technology deployment across multiple project locations, supporting operational activities, field systems, communications, and new site readiness.

Education

DINAMIKA SURABAYA
Bachelor of Science
Management Informatics

Certifications & Training

ICND
Wireless Essentials
Windows Server Administration
Motorola Radio and Repeater
Maintenance.

Core Competencies

- IT Operations Leadership
- Infrastructure Planning & Management
- Team Coordination & Technical Leadership
- IT Service & Incident Management
- Infrastructure Standardization
- Problem Solving & Root Cause Analysis
- Process Improvement & Automation
- Business Continuity Planning
- IT Asset Governance
- Technical Documentation & SOP Development
- Vendor & Contractor Coordination
- Remote Site Technology Deployment
- Cross Functional Collaboration
- Operational Risk & Reliability Management

Technical Skills

Networking

TCP/IP, VLAN, Routing, Switching,
DHCP, DNS, NAT, Firewall, Bandwidth
Management, Failover, Structured
Cabling

Network Devices

MikroTik, MikroTik CCR, Wireless Access Points, Point to Point Wireless Systems

Servers & Systems

Windows Server, Active Directory, Group Policy, File Server, File Server Resource Manager (FSRM), Backup & Recovery

Security

Firewall Configuration, User Access Management, Endpoint protection, Antivirus Management

Communication Systems

Motorola Radio, GR500, CDR700 Repeater, Digital Radio, PABX/IP-PBX, Satellite Communication

Surveillance

IP Camera, PTZ Camera, CCTV Infrastructure, Wireless Camera Backbone

Applications & Development

Microsoft Access, Attendance Management Systems, Payroll Systems, Inventory Management Applications, HTML, CSS, JavaScript, Laravel, MySQL

Infrastructure & IT Operation

IT Asset Management, Server Infrastructure, Network Monitoring Tools, Structured Cabling, Solar Power Systems, Grounding Systems

Leadership & Management

- IT Operations Management
- IT Infrastructure Planning
- Team Leadership & Technical Coordination
- Project Planning & Implementation
- Incident & Problem Management
- Root Cause Analysis
- Vendor & Technical Coordination
- Technical Documentation and SOPs
- IT Asset Management
- Remote Site Support
- Business Continuity & Backup Planning
- User Access Management.

Project Portfolio

Infrastructure Engineering

- Standardization of structured cabling and centralized distribution architecture across operational sites.
- Deployment of connectivity and technology infrastructure for office, industrial, mining, shipyard, and remote environments.

Key achievements

- Established centralized user identity and access administration for project operations.
- Built complete IT facilities for new project sites from the ground up, covering connectivity, computing resources, and operational technology requirements.
- Deployed wireless access infrastructure to support Fleet Management Systems in field operational areas.
- Established wireless links for PTZ surveillance systems across mining pit locations.
- Designed and constructed a mini communication shelter together with an independent solar power solution for remote operations.
- Coordinated ISR radio licensing requirements and configured Motorola CDR700 repeater systems for operational communications.

Responsibilities

- Directed IT support across three project locations: Toka, Weda, and Gag.
- Coordinated technology projects from requirement analysis and planning through deployment and operational handover.
- Managed implementation schedules and coordinated technical activities with project stakeholders.
- Provided escalation support for infrastructure, communications, systems, and end user issues.

PT Logindo SamudraMakmur, Tbk
ICT Supervisor (07/2014 – 04/2016)

Oversaw IT services for office and shipyard operations supporting vessel activities and corporate business processes.

Key achievements

- Established centralized directory and access services to improve user administration and resource control.
- Re-engineered the structured cabling system using modular patch panels and organized core switch connectivity, improving network reliability and installation standards.

Responsibilities

- Supervised daily IT operations for the Balikpapan office and Muara Kembang shipyard.
- Supported internet, email, ERP, and other business critical services.
- Maintained email and communication services operating through satellite connectivity for offshore vessels.
- Investigated and resolved hardware, software, connectivity, and communication incidents affecting operations.

PT. Borneo Cahaya Kemilau
System Administrator (03/2012 – 06/2014)

Administered servers, computers, connectivity, and technology services supporting day-to-day company operations.

Key responsibilities & achievements

- Installed and prepared server and workstation environments, including operating systems and required business applications.
- Maintained company connectivity and optimized network performance for operational requirements.
- Established backup routines to improve data availability and recovery readiness.
- Administered MikroTik based connectivity, including routing, firewall functions, bridging, bandwidth control, and wireless links.
- Developed a Microsoft Access payroll application that processed attendance information collected from fingerprint devices.
- Provided technical escalation and user support across computing, server, connectivity, and application environments.

- Design of technology infrastructure for new operational sites.
- Design and Development of technology infrastructure and independent power solutions for new and remote operational sites.
- Implementation of grounding and electrical protection for field technology equipment.

Multi-site IT Systems

- Centralized identity and access management, server-based file sharing, and resource management across multi-site operations.
- Implementation of backup and recovery practices supporting operational data availability.
- Support and integration of ERP, attendance, payroll, and inventory systems across operational and administrative functions.

Operational Technology

- Deployment of biometric attendance solutions with automated data processing and integration into administrative workflows.
- Development of payroll and inventory applications to replace manual administrative processes.
- Integration of technology solutions with operational and administrative workflows.

Communication & Surveillance

- Migration of operational radio systems from analog to digital platforms, including Deployment and maintenance of Motorola repeater infrastructure.
- Development of wireless connectivity for PTZ and IP surveillance systems.
- Support for satellite-based communication services supporting offshore operations.

PT. Telen Indoclay
IT Superintendent (11/2008 – 04/2011)

Responsible for establishing and supporting the company's technology environment for office and business operations.

Key responsibilities & achievements

- Established the company's internet backbone connectivity to support business operations.
- Deployed routers and firewall infrastructure for controlled network access.
- Introduced a centralized file sharing environment to improve information accessibility.
- Deployed an antivirus management server for centralized endpoint protection.
- Provided ongoing infrastructure support, maintenance, and technical issue resolution.

PT. Petrosea, Tbk
IT Communication Officer (11/2001 – 05/2008)

Supported communication and technology services across operational environments, ensuring reliable availability of field communication and supporting systems.

Key Responsibilities

- Provided technical assistance for computing, software, connectivity, and user related issues.
- Maintained Motorola GR500 repeater systems and operational radio communication equipment.
- Diagnosed issues involving UPS equipment, printers, wireless connectivity, network cabling, and telephone/data infrastructure.
- Supported installation, maintenance, and field troubleshooting of communication and technology systems.
