RUDI FAISAL

IT SPECIALIST | INFRASTRUCTURE, NETWORK & DIGITAL SOLUTIONS

https://wa.me/+6282159177311 | https://rudipaisal.github.io

Professional Summary

IT Specialist with over 20 years of experience managing network infrastructure, servers, systems, radio/GPS communications, and business technology across mining environments, oil & gas supporting operations, and remote site projects. Combines hands on technical expertise with operational IT leadership, software development, and process optimization. Proficient in complex network connectivity (PTP, VPN, MPLS), business applications, cloud/VPS concepts, AI Agents, n8n automation, and Laravel chatbot integrations with AI model APIs.

Key Achievement

- Replaced the manual spreadsheet based attendance and payroll data processing system with an HRIS application integrated with online face/finger devices, increasing data processing efficiency by ~95%.
- Analyzed and rebuilt underperforming network infrastructure, specifically optimizing VLAN setups, routing, CIDR prefixes, and implementing a structured cabling management system, which reduced network troubleshooting time by ~65%.
- Built wireless Point to Point (PTP) connections and solar power systems for off grid areas to connect time attendance machines and long-range PTZ cameras deployed at dynamic PIT locations, maintaining up to 95% network uptime and stability.

Professional Experience

PT Roda Jaya Sakti | Section Head of Information Technology **Aug 2023 - Apr 2026**

- Modernized heavy equipment radio communications from analog to digital, enhancing signal reliability and audio clarity across the fleet.
- Replaced the manual spreadsheet based attendance recording system with an integrated attendance application connected to facial/fingerprint recognition devices, reducing manual data entry by up to 98%.
- Improved corporate data management and security by implementing an ADDS server, centralizing user account administration, data access control, and group policy enforcement.
- Resolved recurring network connectivity issues involving routers, core switches, and structured cabling systems.
- Established and expanded wireless network coverage across the PIT area to support real-time data transmission for attendance machines and long range PTZ cameras.
- Modernized power infrastructure in remote areas beyond the main generator network by implementing standalone solar power solutions, particularly at dumping points and loading areas within the PIT.
- Managed IT inventory data and end to end IT asset lifecycle management.

PT Samudera Mulia Abadi | ICT Supervisor **April 2016 - Nov 2022**

- Established IT Infrastructure facilities for new project sites and coordinated with management on project progress, covering the entire project lifecycle from: requirements assessment, design and planning, budgeting, configuration, and commissioning through final handover to the site IT team.
- Managed centralized access and data administration using ADDS server and expanded wireless network infrastructure to support Fleet Management System (FMS) applications and long range PTZ cameras.

Professional Experience

- Established the radio repeater infrastructure for the GAG Project, including equipment usage permits and repeater shelter construction powered by a standalone solar energy system.

PT Borneo Cahaya Kemilau, Tbk | System Administrator **Mar 2012 - Jun 2014**

- Responsible for server and workstation administration, network connectivity infrastructure, and data backup and recovery management.
- Managed MikroTik configuration and operations, including routing, firewall management, bandwidth control, and wireless network optimization.

PT PT Telen Indoclay | Section Head of Information Technology **Nov 2008 - Apr 2011**

- Designed and managed internet backbone networks, router/firewall infrastructure, centralized file sharing systems, and antivirus security for servers and client workstations.
- Ensured IT infrastructure reliability and proactively resolved technical issues to support uninterrupted daily operations.

PT Petrosea, Tbk | Communication Officer **Nov 2001 - May 2008**

- Managed and maintained the reliability of IT systems and network communications, including radio repeater infrastructure, UPS systems, wireless links, structured cabling, and voice and data communication networks.

Technical/Capabilities

Network & Infrastructure

TCP/IP, VLAN, routing & switching, DHCP/DNS, NAT, firewall, bandwidth management, failover, structured cabling, PTP wireless (MikroTik/ Ubiquiti/cambium) , VPN, MPLS, MikroTik/Cisco, access points.

Servers & Security

Virtualization Technologies: VMware Vsphere, Proxmox VE. Ubuntu, Kali Linux, Windows Server, Active Directory, Group Policy, file server/FSRM, backup & recovery, endpoint protection, Fortinet, antivirus, user access management, network monitoring. Network Simulation: GNS3, Cisco Packet Tracer.

Software & Business Applications

Software programming; Laravel, MySQL, HTML, CSS, JavaScript, Microsoft Access; payroll, attendance, inventory, and service maintenance applications; business process integration.

Cloud, AI & Automation

Cloud computing and VPS concepts; AI Agents; n8n workflow automation; implementation of Laravel chatbots integrated with AI model APIs.

Communication & Surveillance

Motorola analog/digital radio, GR500/CDR700 repeaters, PABX/IP PBX, satellite communication, CCTV /IP/PTZ cameras, wireless surveillance links, IoT, GPS Tracker, solar powered remote systems.

IT Leadership & Operations

IT operations, infrastructure planning, root cause analysis, SOP/documentation, vendor coordination, IT asset management, project delivery, backup/continuity, remote-site support

Training

Networking and Administration (Certificates): ICND, Wireless Essential, Windows Server Administration. Radio Communication: Motorola radio programming and troubleshooting. Safety Performance: Basic Safety, HIRA, JSEA.

Education

Bachelor of Science : Management Informatics, Dinamika University of Surabaya
